Iraq reconstruction Web site gets new look

Gulf Region Division US Army Corps of Engineers

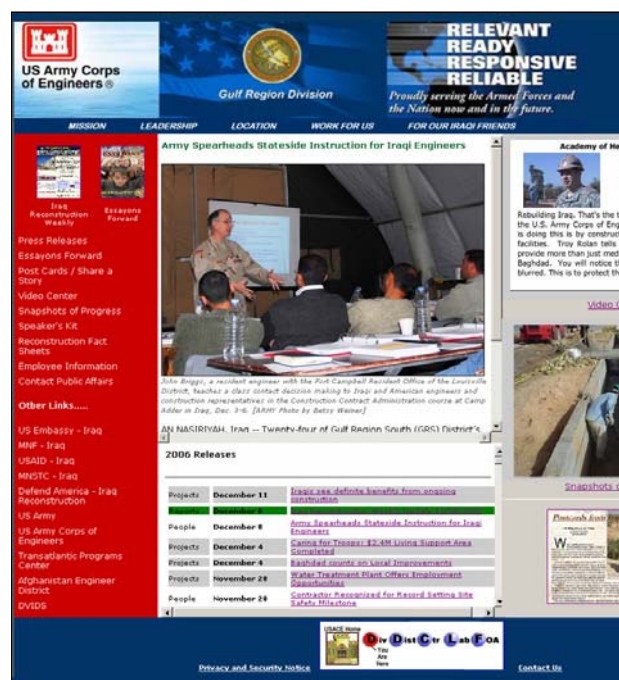

Baghdad, Iraq – Want to find the latest reconstruction statistics and information by the U.S. Army Corps of Engineers in Iraq? Want to see the latest video on construction projects? If so, check out the U.S. Army Corps of Engineers redesigned Gulf Region Division Web site at www.grd.usace.army.mil.

The redesigned site offers the most recent press releases highlighting the Gulf Region Division's projects throughout the country; the most recent issue of the Division's newsletter, *Essays Forward*; fact sheets reporting the most recent reconstruction numbers; and the newest Speaker's Kit to be used for presentations focusing on reconstruction.

Updated photographs and videos of Gulf Region Division reconstruction projects can be viewed and downloaded from the site, which also has helpful links to other sites that highlight efforts in Iraq.

Content will be updated regularly and is all downloadable and releasable. Plans to institute listserv subscriptions are in the works to make it even easier to stay up-to-date on what the U.S. Army Corps of Engineers is doing in Iraq.

GRD hopes the user-friendly format will make navigating the site easier and more informative. Improvements are ongoing, and your comments and suggestions are welcomed.
